Work Experience Application

Placements offered August to March ONLY

Thank you for your enquiry regarding work experience at Canberra Equine Hospital. Due to the high demand for placement we require students to complete the application form below. We select students for work experience who we believe will get the most out of the experience and will integrate well in the high paced work of equine veterinary medicine.

The following items must be submitted with your application:

1. Emergency Details Form
2. Questionnaire
3. Resume/CV and cover letter
4. Any relevant school paperwork/information

When we have received your paperwork a senior member of the Canberra Equine Hospital team will review your application. If we believe that you are suitable for our work experience program we will contact you to organise a short interview and tour of our facilities. At this interview it is important to wear practical work clothes and enclosed footwear as you will be shown our hospital and may be asked to demonstrate horse handling skills.

Due to the inherent dangers involved in handling horses it is our priority to ensure the safety of our staff and visitors. We required students to be honest and detailed in demonstrating their experience with horses and horse handling.
